EPIC COMMERCIAL PUMPS

EPIC COMMERCIAL PUMPS

The Epic Commercial Centrifugal Pump is specifically designed to meet the needs of large scale public swimming pools and aquatic parks.

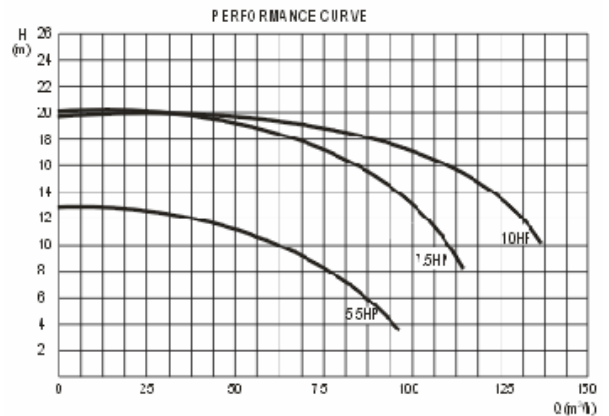

With its high flow the Epic Commercial Pump more than meets the requirements expected by today's commercial pool designer / operator.

The inlet and outlet diameter (100mm – 4 inch) allows for high flows at lower head loss. The Epic Commercial Pump is made from a premium grade ABS stabilized thermoplastic material, incorporated with a corrosion resistant motor housing which is standard. The high efficiency of impellers and fans helps to improve function and lower energy use.

Features & Advantages

- Large capacity filter basket, minimizes regular cleaning
- High pump base for water and corrosion protection
- Rapid self priming capability ensures maximum cooling of the seal.
- Uniquely designed; large flow; high-lift
- Low energy consumption

Code	Model	Power H.P./KW	Voltage V/Hz	Flow m³/h	Pipe size inch	Ctn. Qty.	G.W kg	Dimension mm
