

Puhinui School

To Whom It May Concern:

Puhinui School upgraded the school swimming pool in 2008. Jonkers Pool Systems undertook the work which included lining the existing concrete surfaces with the Delifol PVC liner. The pool has been operating with the new liner for two seasons. The liner transformed the old tired surfaces which were chipped and also leaked. The pool now looks good and meets all of our expectations. We can certainly endorse the Delifol product and the quality of installation provided by Les and Kurt Jonkers.
